

DR. NURUDEEN SHOWOLE

Clinical Data Analyst | Research Scientist | Health Informatics Graduate Student

showolen@mail.gvsu.edu | (616) 290-6001 | Michigan, USA | github.com/showolen-sudo

PROFESSIONAL SUMMARY

Dynamic medical doctor with strong research background and solid technical skills in data analytics, bioinformatics, and digital health. Experienced in integrating clinical knowledge with data driven methods to support research, innovation, and evidence based medicine.

EDUCATION AND CERTIFICATION

M.S. Health Informatics and Bioinformatics, Grand Valley State University, MI

Expected April 2027 | College of Computing

Diploma in Data Analysis, Dimplattech

2023 | Lagos, Nigeria

Bachelor of Medicine, Bachelor of Surgery (M.B.B.S.), Olabisi Onabanjo University, Nigeria

February 2021 | Ogun State, Nigeria

TECHNICAL SKILLS

Languages & Tools: Python, R, SQL, PySpark, Neo4j (Cypher), SPSS, PowerBI, Google Colab, Microsoft Excel

Methods: Machine Learning (XGBoost, Random Forest, Logistic Regression, CNNs, Naive Bayes), ETL Pipelines, Medallion Architecture, KDD Process, SHAP Explainability

Domain: EHR Management, Clinical Decision Support, Digital Health, Biostatistics

RESEARCH WORK

- **"Socioeconomic Status and Health Information Seeking as Determinants of Self Medication Practices"** — Recognized and approved by the American Medical Informatics Association (AMIA) for presentation, Dallas, November 2026
- **"Trust and acceptance of artificial intelligence (AI) technology in healthcare among final year trainees at Grand Valley State University"** — Questionnaire administration
- **GAITLY AI:** Smartphone Parkinson's screening app — In development. Won Grand Rapids DeepTech Pitch Competition, April 2026
- Familusi, S., **Showole, N.**, et al. (2025), *"Epidemiological Studies on Cholera Disease Outbreak in Ikeja, Lagos State, Nigeria"*, Submitted
- **Showole, N.**, & Michael, R. (2025), *"Evaluating Clinical Decision Support Accuracy Using EHR"*, St Luke's Hospital, Internal Research

PROJECTS

- Disney Lorcan TCG Analytics: "What Wins vs. What Sells" (Python, XGBoost, SHAP) — Built end to end KDD pipeline on 749 tournament decks and multi source price data, engineering 87 deck level features to model competitive success vs. market price
- Data Engineering (PySpark/Google Colab): Built ETL pipelines across five datasets using Medallion architecture with `safe_int_cast()`, `coalesce()` date parsing, and audit first approach
- Python Clinical Models: Handled missing clinical data and summarized lab results for St Luke's Hospital; vital sign distributions estimated to fast track nursing workflow by 15%

WORK HISTORY

St Luke's Hospital Ltd, Lagos, Nigeria

Clinical Data Analyst (Remote) | 03/2025 - Present

- Data cleaning, integration, reduction and transformation from extracted EHR data
- Use of SQL, Python and PowerBI visualization to conduct statistical analyses to identify trends and performance within the hospital workflow, reducing errors by 12%
- Provide analysis and guidance to the hospital board based on clinical data insights, improving services by 18%
- Clinical research on analysis, trends and accuracy of EHR in Avon Medical Practice, improving EHR efficiency by 8%

Avon Medical Practice, Lagos, Nigeria

General Physician | 04/2021 - 12/2024

LEADERSHIP AND AWARDS

- Grand Rapids DeepTech Pitch Competition Winner, College of Computing, GVSU (April 2026)
- Certificate of Recognition by GVSU College of Computing for research work: "Socioeconomic Status and Health Information Seeking as Determinants of Self Medication Practices" (April 2026)
- Student Scholar Mentor Award, Olabisi Onabanjo University Medical Students Association (September 2018)
- Teaching Excellence Award, Mathematics Department, Olabisi Onabanjo University (May 2011)
